

NEWS: U1 STOOL

Design: Christian Juhl

The Andersen U1 stool is a fun and different stool, which has just been launched by Andersen Furniture. The stool is designed by Christian Juhl, who has combined wood and metal on a new and non-traditional way. The stool is made from solid ash and is fitted with patent locking brackets in stainless steel. The patent locking brackets are constructed on exactly the same principle that we know from jars and bottles all over the world, making it easy to remove the legs. All in all, a functional, decorative and expressive stool.
